

# All Natural Alfalfa

## Juvenile, Adults, & Breeding Small Animals

*A Marion Zoological Product*

100% Pure Alfalfa Hay is a premium, all-natural food that is grown in the fertile valleys of the U.S.A. Cut at night and dried by day, these premium “first” cuts of alfalfa are only available during certain times of the year. Small animals like rabbits, gerbils, rats, mice, guinea pigs, chinchillas and hedgehogs benefit from alfalfa’s high nutrient quality, helping to improve digestive development in juveniles, longevity in adults, and success in breeding.

**Alfalfa Hay**
