

# Adasio™ Performance Alfalfa

## Alfalfa Hay - Bales

### Equines

Adasio Performance Alfalfa Bales are an important part of the Adasio Feeding Programs for horses. Our Alfalfa bales are the right answer for all horse's needs. Performance from your horse requires the right blend of forage and grains. And when not performing, our recommended rations keep your horse in peak and healthy condition. Adasio hay can also be used to economically keep horses of any age and purpose in top condition. Adasio Feeding Programs can help you minimize your cost of maintenance and bring your horses up to maximum performance quicker.

Adasio Corp is known for its high quality crops grown under an environmentally sound water conservation program in the U.S.A. This sustainable agricultural practice provides a rich supply of organic nutrients to the fields producing high feed value alfalfa hay. No chemical fertilizers are ever applied or needed on our fields.

#### BALANCED ELECTROLYTES

Unlike any other alfalfa, Adasio alfalfa is made from plants grown under controlled environmental conditions in a one-of-a-kind water recycling project. This recycled water contains hydro-organic nutrients that add calcium, magnesium and phosphorus.

#### TENDER AND NON-TOXIC LEAVES

In addition to its environmental protection and water conservation benefits, Adasio alfalfa is grown in fields without chemical fertilizers or herbicides. The smaller and softer stems and dark green leaves are also free of toxins and heavy metals.

#### HIGHER QUALITY PROTEIN

Studies by Adasio S.A. in Guatemala prove that high quality balanced protein is essential for horse health.

*"Adasio alfalfa has proven successful in all phases of horse maintenance and recovery because they are the most effective balance of high quality protein, low carbohydrates, and hydro-organically boosted vitamins and minerals. It is also a testament to exceptional farming practices and concerns for the environment and water natural resources."*

~ Geraldine Nidasio, GM Adasio S.A.

Alfalfa Hay Bales

#### BENEFITS

- Replaces all concentrates, oil and grains
- 100% effective even with low quality local forages (< 6% protein)
- Balanced amino acids for sweet stalls
- Steady weight gain and control
- Simple and cost-effective

#### USDA INSPECTED & CERTIFIED

- Servi-Tech quality reports on each field and harvest
- USDA inspected
- Insect free

# Specifications

## FEEDING GUIDELINE

Physiological Stage	Maintenance	Light Work	Stallion	Moderate Work	Gestation (last 90 da)	Lactation	Heavy Work	Yearling	Foal Growth
Adasio Alfalfa* (lb/day)	3 to 6	2 to 2.5	2 to 2.5	3	4	6	5	3	1
Local Hay (lb/day)	20	20	20	20	20	15	20	10	3
Salt (oz/day)	1	1	1	1	1	1	up to 2	0.5	0.5

For 1200 lb mature weight horses, calculated 2% DMI. Yearlings calculated at 600 lb mature weight, 2% DMI. Foals calculated at 300 lb body weight, 2% DMI.

Add vitamin/mineral supplement in balanced diet and follow label instructions. Ask your nutritionist or veterinarian.

\*Always consult with your Adasio representative for the appropriate alfalfa or alfalfa mix variety for your animals.

### ADASIO™ PERFORMANCE Alfalfa Hay - Bales

#### Certified Field R1-5B

#### Guaranteed Analysis

Protein .....	27% min. (dry)
Acid Detergent Fiber .....	28% min. (dry)
Neutral Detergent Fiber .....	32% min. (dry)
Total Digestible Nutrients .....	69% (dry)
Relative Feed Value .....	195
Moisture .....	13% max.
NO <sub>3</sub> -N .....	889 mg/kg (dry)

#### Ingredients

Alfalfa (*Medicago sativa*)

Quality: Supreme

### ADASIO™ PERFORMANCE Alfalfa Oats - Bales

#### Certified Field R13-2

#### Guaranteed Analysis

Protein .....	23% min. (dry)
Acid Detergent Fiber .....	30% min. (dry)
Neutral Detergent Fiber .....	40% min. (dry)
Total Digestible Nutrients .....	69% (dry)
Relative Feed Value .....	151
Moisture .....	9% max.
NO <sub>3</sub> -N .....	1060 mg/kg (dry)

#### Ingredients

Alfalfa and Oats, Field Grown  
(*Medicago sativa*, *Avena sativa*).

Quality: Supreme

### INSTRUCTIONS

Before you start any feeding program, contact your Adasio Representative. A review of your current feeding program is highly recommended to achieve the best performance.

- Keep hay dry
- Examine hay cubes weekly for signs of deterioration

**NOTE:** Nitrate low (701 - 1400 mg/kg NO<sub>3</sub>-N) considered safe to feed horses.
